What Is the Gary Plan?

By ALICE BARROWS FERNANDEZ

Tribune readers will find in this department a clear and authoritative account of the Wirt school system, proposed for this city. Questions of parents and teachers will be gladly answered. The department will appear on Mondays and Thursdays.

WHAT THE WIRT PLAN DOES. It takes children off the streets and keeps them wholesomely busy at work, study and play for six or

even hours a day. It gives all children just as much academic work as the traditional school, but by lengthening the school day it gives time for practical shop work, science, drawing, music, auditorium and play for all children.

WHAT THE WIRT PLAN MEANS. To every parent-A chance to give his child the enriched educational

opportunities usually reserved for the children of the favored few. To teachers-No more hours of teaching; more congenial work. To the community-Better citizens, better schools for less cost.

Peak Load Education Unpractical—Schools Must Be Changed to Meet Needs of Children To-day-Gary Plan Unloads Peak Load.

"Dear Madame: There has been a great deal of discussion lately in the public prints about warring factions in the Board of Education and accusawith the Gary plan and giving a better education to children? No objection to point, I these good people throwing things back and forth at each other, but the rest of "EMMA E. FRANCIS

This department has neither space nor inclination for a discussion tionists may have in mind for the of the political situation in the New York Board of Education. In our future I do not know, but the war will epinion, such discussion merely serves to becloud the real issue, with the result that the public, blinded and rather choked by the dust of contro- stage. versy, is likely to forget the real question at stake and turn away in point. Dr. Magnes turned to the boses

The Real Issue in Education

The real issue in education in this city to-day is this, Are the schools railway facilities and the freight yards of the past to be changed to meet the needs of the children of to-day? same Will the people of this city realize that such changes for the good of the | \$1 to \$25,000 rolled in on the board hildren can be brought about only through the cooperation of all mem-shouting chairman. Women and me bers of the community? If so, political fights will find their proper level and leave the way clear for real accomplishment. If not, New York will be the last, instead of the first, to bring about educational charges which are bound to take place all over the country in the next ten years.

Peak Load Education Unpractical.

The trouble with the present school system is that it ignores the

two important elements in their education—that is, wholesome work to the public libraries or to churches. Such a distribution of the children means that the school and library and playground are loaded beyond

No other public utility in the city is run on this peak-load basis. We ubways and public lighting systems and waterworks and telephones and 6 o'clock every one use the surface cars and 'buses, but not the subway and elevated. Of course, under those circumstances, a city could not have a transportation system at all, because the peak-load would be made as great as possible on each one of these facilities at a given time, in-

done our duty. Then we realized that they needed opportunities for
